Electronics 5GT is designed for long and high capacity cables (contact our factory)

Available in option :

- 3G3 electronic, supply between 15 and 30Vdc, push-pull output regulated 12Vdc
- 5GH electronic permits to drive different inputs (plc + display for example)

Protection against short circuits the electronics: 5G5, 5GT, 3G3

Protection against inversion of polarity for all the electronics except 2G2

Option "Max control" : the encoder gives on real time its physical environment parameters: shocks and vibrations, too high or too low temperature, too low or too high supply, quality of the output signals : upon request..
